

Dog's Name: Bucky, Riley, Copper

City:

Bucky, Riley & Copper's Story:

We have the honor of having adopted three of the most endearing and loving Golden Retrievers. All three are Mr. Personality, in their own way. Riley and Bucky are our Senior gentlemen. Both are ten. Copper is the young one, being five years old. They all play differently. Riley walks around with a tennis ball in his mouth and dares you to take it from him....Bucky will sometimes chase the ball but that walking thing, ball in mouth, also suits him just fine. He is also our talker. He is so happy to see you when you come into the house that he will wag that little rear end and just talk and talk to you. Copper is the ball chaser and is also the squirrel watcher. We really believe that he is hoping to see that squirrel fall out of the tree, into the fenced yard and look at it face to face. These sweet things just make your day so much better and love you unconditionally. They follow you around the house, lay by your feet, and sometimes along side of you on the couch with a small face on your lap, and you know that you would do anything for them, love them and take care of them. These are our buddies.
