Retriever rehab

Pet lovers can find it frustrating to know about human medical technology that isn't made available to pets. We need to give back something of what research animals have long suffered to give us.

So it's great news to hear about Walker the golden retriever who was hit by a car in April and underwent surgery, financed by (Golden Retriever Rescue of Wisconsin) [GRROW](#).

But Walker still needed more help, and so he was brought to Best Friends Veterinary Center, 2082 Cheyenne Court, Grafton, (262-375-0130). The Center is one of only a few to offer rehabilitation on an underwater threadmill. Walker was, according to reports, happy as a clam to get in there.

Walker is continuing with the therapy and doing well. The service is available to dogs in this area.
